

Top 20 Discrepancies of Waste Received to Waste Shipped in 2007

Report run on: January 20, 2009 - 1:48 PM

Version 5.0

User Selection Criteria

Location: Kansas

BR Cycle: 2007

Number of Sites Limit: 20

Results:

Data meeting the criteria you selected follows.

Total Pages: 2

Report Description

This report is intended to cross-check RCRA hazardous waste receipts and shipments. Since receipts may come from out of State, **this report has limited use until data from all States is available in the RCRAInfo National Biennial Reporting Database.** This report is from the viewpoint of the receiver, thus, the location criteria specified for the report is the location of the receiver.

Records are selected based on receiver facilities that satisfy the select logic and also have a matching shipper facility that satisfies the selection logic. Receiver facilities and received quantities are limited by the following criteria: the waste was reported on a Form WR for the user selection criteria, where the facility and waste were marked to be included in the National Biennial RCRA Hazardous Waste Report and the waste received quantity is greater than zero. Shippers and shipped quantities that meet the selection criteria are displayed for each receiver facility, and are limited by the following criteria: the waste was reported as shipped on a Form GM for the user selection criteria, where the facility and waste were marked to be included in the National Biennial RCRA Hazardous Waste Report.
