

Top 20 Discrepancies of Waste Shipped to Waste Received in 2007

Report run on: January 20, 2009 - 1:50 PM

Version 5.0

User Selection Criteria

Location: Kansas

BR Cycle: 2007

Number of Sites Limit: 20

Results:

Data meeting the criteria you selected follows.

Total Pages: 2

Report Description

This report is intended to cross-check RCRA hazardous waste receipts and shipments. Since receipts may come from out of State, **this report has limited use until data from all States is available in the RCRAInfo National Biennial Reporting Database.** This report is from the viewpoint of the shipper, thus, the location criteria specified for the report is the location of the shipper.

Records are selected based on shipper facilities that satisfy the select logic and also have a matching receiver facility that satisfies the selection logic. Shipper facilities and received quantities are limited by the following criteria: the waste was reported on a Form GM for the user selection criteria, where the facility and waste were marked to be included in the National Biennial RCRA Hazardous Waste Report and the waste shipped quantity is greater than zero. Receivers and received quantities that meet the selection criteria are displayed for each shipper facility, and are limited by the following criteria: the waste was reported as received on a Form WR for the user selection criteria, where the facility and waste were marked to be included in the National Biennial RCRA Hazardous Waste Report.
