Data meeting the criteria you selected follows.
Total Pages: 2

Report Description

This report is designed to identify facilities within the State which impact the State's hazardous waste generation total and have significantly changed since the last reporting cycle. The user specifies the number of facilities to print (thus making the report useful for both large and small States). All generation quantities refer to the generation quantity in the National Biennial RCRA Hazardous Waste Report. Quantities are limited to waste where the Handler is to be included in the National Report, the GM Form is to be included in the National Report, and the generation amount for that GM Form is greater than zero.

Report Information

Name: b_top_generators.rdf
Developed By: EPA Headquarters, Office of Solid Waste
Deployed: May 2004
Last Revised: September 2009
