## User Selection Criteria

<b>Location:</b>	Kansas
<b>BR Cycle:</b>	2007
<b>Compared to BR Cycle:</b>	2005
<b>Number of Sites Limit:</b>	20

## Results:

Data meeting the criteria you selected follows.

Total Pages: 2

## Report Description

This report is designed to identify facilities within the State which impact the State's hazardous waste management total and have significantly changed since the last reporting cycle. The user specifies the number of facilities to print (thus making the report useful for both large and small States). All management quantities refer to the management quantity in the National Biennial RCRA Hazardous Waste Report. Quantities are limited to wastes where the Handler is to be included in the National Report and either the GM Form is to be included in the National Report and the managed amount for that GM Form is greater than zero or the WR Form is to be included in the National Report and the received amount for that WR Form is greater than zero. All waste managed by storage only (system type H141) is excluded.

## Report Information

Name:	b_top_managers.rdf
Developed By:	EPA Headquarters, Office of Solid Waste
Deployed:	May 2004
Last Revised:	September 2009
