

Institutional / Engineering Controls Report

Report run on: August 20, 2009 - 5:16 PM

Version: 5.0

User Selection Criteria

Location: COLORADO

County: None Chosen

State District:

Handler Name:

Handler ID:

Group of IDs: None Chosen

Show Detail: Yes

Results

Data meeting the criteria you selected follows.

Total Pages: 4

Total Handlers 6

Report Description

This report shows the number of handlers with engineering controls (ECs) in place (CA770) and/or institutional controls (ICs) in place (CA772) based on the user specified criteria. The report also shows the number of ECs terminated (CA780) and ICs terminated (CA782). The user may run the summary report only or the summary and detail report. The detail report shows the handler id, handler name, EC event status and date and the IC event status and date for the most recent CA770/CA780 and/or CA772/CA782 event based on event actual date and sequence number. If a handler has multiple events with different status codes occurring on the same day all events with the appropriate status codes will be displayed for that handler.

Report Information

Name: ca_controls.rdf
Developed by: EPA Headquarters, Office of Resource Conservation and Recovery
Deployed: December 2008
Last Revised: June 2009
