Total Handlers: 7

Report Description

This report lists and summarizes the facilities managing hazardous secondary material under the 2008 Definition of Solid Waste final rule. Data is based on the most recent HSM information for the user-selected period. Note: total quantities are calculated using only HSM data from generators (i.e., tons managed as reported by facility codes 01, 02, 04, 06, 09, 10, and 11) to avoid double-counting. The average number of hazardous secondary materials managed per facility is calculated by considering each unique set of waste codes and facility code to be a different HSM. Facilities which have submitted a stop notification are excluded. Under the DSW rule, facilities must submit a notification prior to managing HSM and every other year thereafter.

Estimated Tons - Total estimated tons of HSM to be managed over the next 12 months

Actual Tons - Total actual tons of HSM managed during the most recent odd numbered year

Mgmt. Start Date - HSM management start date, as reported on the initial notification

Report Information

Name: hsm_list_facilities.rdf

Developed by: EPA Headquarters, Office of Resource Conservation and Recovery

Deployed: April 2010

Last Revised: February 2010

List of Facilities that Are Managing HSM

Report run on: August 11, 2010 - 3:11 PM

Facility Code

Code	Description
------	-------------

01	HSM generator reclaiming HSM on-site
06	HSM generator transferring HSM off-site to a domestic reclamation facility
07	Reclaimer receiving HSM from off-site

Land-Based Unit Code

Code	Description
------	-------------

OT	Use other to manage hazardous secondary material.
PL	Use pile(s) to manage hazardous secondary material.
SI	Use surface impoundment(s) to manage hazardous secondary material.

List of Facilities that Are Managing HSM

Report run on: August 11, 2010 - 3:11 PM

Summary

Number of facilities that managed hazardous secondary material:	7
Number of facilities that did not stop HSM management:	7
Total estimated tons of hazardous secondary material to be reclaimed:	257
Total actual tons of hazardous secondary material that were reclaimed:	115
Average number of HSM (unique waste code/facility code sets) reclaimed per generator:	1.14
