Report Description

This report lists the top fifty four-digit Primary NAICS codes which generated the most waste within the handlers selected (State or National). The Primary NAICS codes are ranked high to low based on their total tons of hazardous waste generated. The four-digit Primary NAICS code, the NAICS description, and total quantity of RCRA hazardous waste generated (in tons) are provided.

All quantities refer to the generation quantities reported for the National Biennial RCRA Hazardous Waste Report. Data is limited to the following criteria: the waste was generated by a handler that has been flagged for inclusion in the National Biennial RCRA Hazardous Waste Report, the waste generation has been flagged for inclusion in the National Biennial RCRA Hazardous Waste Report, and total quantity generated is greater than zero.
